

Yet another rapidly deepening area of low pressure will approach the southwest later on Friday, before crossing Northern Ireland and central parts of Scotland during the middle of Saturday. A further 20-30 mm of rain is expected widely within the warning area, while 40-50 mm is possible on high ground in the southwest. Coming so soon after previous rainfall events, this is likely to augment the impacts.

Valid from 00:15 on Sat, 08th Feb 2014 until 09:00 on Sat, 08th Feb 2014

The public should be aware of disruption to travel from the combination of this heavy rain with the very strong winds, especially in areas where flooding has occurred recently, or is ongoing.

Issued by the Met Office at 12:34 on Tue, 04th Feb 2014
